Imperfect Samples' Schimmel Braunschweig Upright Piano (Pro) is one of the most powerful, dark upright piano libraries available.

The Schimmel Braunschweig Upright Piano has a distinctive sound character that's far more intimate than a grand piano, making it desirable for certain situations where you don't want the polished and precise sound of a nine-foot grand in a concert hall.

Unlike most piano sample libraries, the sounds of the fingers tapping the ivory keys, the pedal, subtle mechanical sounds, and even occassional seat noise, has been recorded in order to preserve as much of a life-like performance as possible. This is what is referred to as "imperfect".

Sampled in multiple velocity layers, with release samples, and true staccato, recorded at 24 bits, and containing 2 microphone perspectives, this library totals over 15GB of data. This sampled instrument's raw and distinctive sound is unlike any other piano sample library currently available. For more info, please visit www.imperfectsamples.com.

• Pro multi-velocity sampled instrument
• Multiple mic perspectives
• Includes performance sounds and effects
• Full length samples, no loops
• 24-bit audio fidelity
• No muted strings
• Raw, dark character
• Realistic

Recommended:
PC or MAC High Performance System With 24bit 48khz Playback
16Gb Available Hard Disk Space
EXS24 or Kontakt 2.2 or higher*
1GB RAM

Installation Instructions:
Copy all files from this DVD onto your hard drive. Please follow the installation instructions included on the DVD(s).

*NB: Kontakt Player is not the same as Kontakt. To run this library with Kontakt, a full version of Kontakt is required.
